CONFERENCE SCOPE

The International Conference EEMS 2017 will cover topics such as sustainable energy, environmental and material development to bring together scholars, leading researchers and experts from diverse backgrounds and applications areas. The scope of the conference can be captured in the following list of subjects:

Energy

- Energy system analysis
- Renewable heat systems
- District heating and/or cooling infrastructures in future smart energy systems
- New energy technologies
- Electricity transmission and distribution
- Energy efficiency in industry, process optimisation, pinch analysis, exergy and exergoeconomic analysis, energy audits
- Renewable electricity generation systems
- Thermal power plants
- Primary and renewable fuels
- Heat transfer, boilers, heat exchangers
- Metrology, measurement systems in energy sector

Environment

- Environmental protection in energy management systems
- Wastewater treatment systems
- Waste treatment
- Waste to energy
- Water system analysis
- Hazardous wastes treatment methods
- Air pollution, control equipment in industry, air quality engineering and monitoring
- Environmental quality management systems

Materials

- Modern materials in energy systems
- Nanotechnology and biotechnology in materials science
- Materials chemistry and physics
- Composite and ceramic materials, constructional and engineering materials, environmental friendly and green materials
- Metrology, measurement systems and precision engineering
- Advanced manufacturing processes
- Additive manufacturing and materials
- Joining, welding and assembly

PUBLICATION OF PAPERS

All papers accepted by the Scientific Committee will be included in the volume of Proceedings published in the *E3S Web Of Conferences* (for Polish scientists - 15 points according to the directive of the Minister of Science and Higher Education). A maximum of two articles per author is accepted.

E3S Web of Conferences is dedicated to archiving conference proceedings in all areas related to Energy, Environment Protection and Earth Sciences.

The E3S WoC have numerous advantages:

- **Open access:** all documents will be free to read and download.
- **Immediate citability:** every document will be identified by authorship, title, and all relevant metadata for indexing and abstracting, e.g. like a DOI enabling the cross-referencing.
- **High visibility:** all documents will be indexed in main databases, such as Web of Science (Conference Proceedings Citation Index), Google Scholar, Chemical Abstracts Service (CAS) and Directory of Open Access Journals (DOAJ), Materials Science & Engineering Database (ProQuest).
